Treatment of Male Urinary Incontinence with ATOMS

Surgical Workshop

March 1-2, 2027

A.M.I.®

Agency for Medical Innovations

Surgical Workshop

Treatment of Male Urinary Incontinence ATOMS (Adjustable Transobturator Male System)

Date

Monday-Tuesday, March 1-2, 2027

Location

„Universitätsklinikum Münster"
Clinic for Urology and Pedriatic Urology
Albert-Schweitzer-Straße 33
48149 Münster, Germany

Content

- Combination of theory and practice in the context of live operations
- Introduction to the use of ATOMS
- Discussion and comparison with other methods of treating male urinary incontinence
- Presentation and discussion of previous results

Your Trainer

Dr. med. Fabian Queissert
Head of Neurourology Department +
Head of Continent Centre

In 2012, Dr Fabian Queissert joined the team at Münster University Hospital. Since 2016, he has been head of the neurourology department and the continence centre. In addition to implanting slings and artificial sphincters, he also began working with ATOMS and thus significantly expanded the spectrum for treating male urinary incontinence.

Dr Queissert is a member of renowned research groups and took part in several ATOMS studies. Among others, he was part of the DOMINO study, which investigated therapeutic and surgical measures for male postoperative stress incontinence in over 1,200 men.

ATOMS

Especially after radical prostatectomy, the treatment of male stress incontinence remains a challenge.

In this intensive workshop you will receive information on the treatment of male urinary incontinence as well as tips on the correct indication and patient selection of different implants.

In the context of live surgery, the most important surgical steps for a perfect result will be clearly demonstrated to you. At the same time, you will have the opportunity to ask questions.

Program

	Day 1
06.00 pm	State of the Art: Conservative and surgical treatment of male urinary incontinence
06.45 pm	How to do: commented video demonstration of an ATOMS operation
07.30 pm	Joint dinner
	Day 2
07.45 am	Live operation of ATOMS
approx. 12.00 pm	Adjustment on the patient and final discussion

Please note that these times are subject to change.
A detailed schedule will be sent prior to each workshop.

About the Hospital

The UKM stands for cutting-edge medicine in the German hospital landscape and is one of the most successful maximum care providers in Germany. With more than 11,000 employees, the UKM Group is one of the largest employers and training companies in the region. Together with the Medical Faculty of the University of Münster, it contributes to the training of doctors and researchers and thus ensure the continuous development of healthcare in Germany and beyond.

Accommodation

Accommodation is reserved by you at your expense.
Recommended hotel: Novotel Münster City, von Steuben Strasse 4-6, 48143 Münster, Germany.

Registration

Registration is compulsory.

Spaces at these workshops are in high demand and are allocated by invitation only. Should you be interested in attending a workshop, please contact your local A.M.I. representative. You will then be waitlisted, and subsequently contacted as soon as a space becomes available.

General Information

Depending on the participants, workshops will be conducted in English and/or German. Therefore a sound, working knowledge of either language is a prerequisite for attendance. To respect the privacy of the patients, we kindly ask you to refrain from taking pictures during surgery.
